

## What makes the Flowflex Covid Antigen OTC test different from all the other tests on the market?

**The Flowflex OTC is approved for single testing!**

The Flowflex COVID-19 Antigen Home Test has been authorized for use as a **single test** by individuals with or without symptoms.

(No serial testing required per the FDA)

### **What do the following tests all have in common?**

- |                         |                                   |
|-------------------------|-----------------------------------|
| Abbott - BinaxNOW OTC   | Access Bio-CareStart OTC          |
| Quidel – QuickVue OTC   | In Bios International- Scov-2 OTC |
| OraSure- InteliSwab OTC | GenBody- GenBody OTC              |
| BD- Veritor OTC         | iHealth Labs- OTC                 |
| Ellume Limited - OTC    |                                   |

All these tests listed are **Serial Screening tests**- (by the FDA)

**Serial testing is a process in which a user must test themselves twice within a two-to-three-day period.**

This makes these tests almost impossible for an employee or student to be tested and go to work or school the same day!

Choose the right test **FLOWFLEX!**

**ONE AND DONE!**
